

Mineral, Organic and Natural Lines **FROM GI PICCO'S**

THREE NEW MAKE-UP LINES FROM GI PICCO'S – AND A NEW CONCEPT LIPSTICK.

With over forty years of experience in producing make-up as contract manufacturers and for private labels and traslating ideas into colour, Gi Picco's has now developed a new MINERAL LINE of make-up which is talc-free and specially formulated for sensitive skins. Made from the highest quality ingredients, the products contain mica for a light and luminous finish, titanium

dioxide for natural UV protection and iron oxides for a natural look, as well as being enriched with natural antioxidants Vitamins A and E. The focal point of the line is the presence of trace elements and precious stones like tourmaline and citrine, that help reactivate microcirculation and revive the skin's radiance.

Mineral compact Powder helps minimize skin irritation and redness and ensures natural cover, as well as reducing the appearance of fine lines, wrinkles and other skin imperfections. The rest of the line comprises blusher,

eyeshadow, lipgloss, canceler, mascara, eyeliner,

foundation, lipstick, terracotta baked Wet & Dry. Sun filters for low, Medium or high protection can also be added on request. The ORGANIC LINE is CERTIFIED by ECOCERT ITALIA n. CB 102/01 and GMO-free and not animal tested as paraben-free. All the botanical components used in the formulations are derived exclusively from certified organic sources, keeping their natural effectiveness. Rich in proteins, glucides,

mineral salts and Vitamin B, the products also contain apricot oil, rich in Vitamins A and E to nourish, hydrate and revitalize the skin naturally. The texture is suitable for all skin types, particularly sensitive skins and offers comfort and protection keeping the hydrolipid film unchanged. The NATURAL LINE is the newest texture developed by Gi Picco's to satisfy the new trends in a market which is increasingly focusing on nature and the environment. All the ingredients are high quality, natural and certified. Talc, mica and zea maize makes the powder silky and on application gives the skin a natural matte finish appearance. The organic shea butter in the formulation is rich in nourishing substances as well as having regenerating, hydrating, soothing and protective

properties. Almond oil, extremely compatible with the skin and delicate, ensures comfort and softness for all skin types, particularly very delicate skins. Like Organic texture, the NATURAL LINE has been CERTIFIED by ECOCERT ITALIA n. CB 102/01. Lastly, Gi Picco's Intense Lipstick is a new concept lipstick. With an odourless formulation, made without preservatives, it makes lips full and sensual. Thanks to soft synthetic waxes, the colours are pure and intense. The lipstick adheres perfectly to the lips with the colour staying true for cover lasting hours on end. Smooth and rich on application, the effect is striking and... intense. MINERAL, ORGANIC and NATURAL Lines are Clinically Tested as well.
